

Nicholas D. Holschuh

Curriculum Vitae

March 2022

Address: Amherst College Geology Department
Beneski Building
11 Barrett Hill Drive
Amherst, MA 01002

Phone: +1 (413) 542-2285

Email: nholschuh@amherst.edu

Faculty Website: [Amherst College](https://www.amherst.edu/~nholschuh/)

Personal Website: nholschuh.com

Github: [nholschuh](https://github.com/nholschuh)

Professional Appointments

- 2020-Present **Assistant Professor of Geology, Amherst College**
- 2016-2020 **Postdoctoral Research Associate, University of Washington**
- 2012-16 **NSF Graduate Research Fellow, Pennsylvania State University**
- 2011-12 **University Graduate Fellow, Pennsylvania State University**
Methods and applications of radio-frequency geophysics in glaciology.
- Summers **Graduate Research Intern, Chevron Energy and Technology Company**
- 2014/15 Improving time shift methods for 4D seismic data analysis
- 2010-11 **Research Fellow, Pacific Tsunami Warning Center.**
Investigating the role of fault geometry on tsunamigenesis
- 2008-10 **Research Assistant, Department of Geology - Carleton College.**
Investigating the surface water chemistry of Rice County, MN.

Education

- | | | | |
|------|--|-------------------------------|--------------------------------|
| 2016 | <i>Ph.D. - Geosciences</i> | Pennsylvania State University | (NSF Graduate Research Fellow) |
| 2015 | <i>Graduate Teaching Certification</i> | Pennsylvania State University | |
| 2011 | <i>B.A. - Geology</i> | Carleton College | (Summa Cum Laude) |
| 2011 | <i>B.A. - Economics</i> | Carleton College | |

Patents

1. Holschuh, N., C. Li, M. A. Meadows, and S. Dobbs (2014). Systems and Methods for Aligning a Monitor Seismic Survey with a Baseline Seismic Survey. *Chevron USA Inc. US14565117*. Place: USA Publisher: USA Patent Office (Pending), 1–16.

Publications

Awards and Honors

- 2018 1st Place Presentation - University of Washington Postdoctoral Research Symposium
- 2016 3rd Place Presentation - Penn State Graduate Student Exhibition
- 2015 Outstanding Student Paper Award - AGU Fall Meeting
- Schenck Teaching Assistant of the Year - PSU College of Earth and Mineral Science
- 2nd Place Presentation - Penn State Geosciences Colloquium
- 2014 Dr. Gabriel and Mrs. Katherine Leblanc Fellowship in the Geosciences
- 2013 Shell Research Facilitation Award
- 2012 NSF Graduate Research Fellowship
- 2011 University Graduate Fellowship - Pennsylvania State University
- Distinction in Undergraduate Thesis - Economics
- Distinction in Undergraduate Thesis - Geology
- Phi Beta Kappa Qualification
- Sigma Xi Qualification
- 2010 Duncan Stewart Fellow in Geology
- 2009 Ernest F. Hollings Scholar

Amherst College: Courses Taught

- Spring 2022 **Geol 112+L: Surficial Earth Dynamics** – (*Enrollment: 31*)
Geol 341+L: Geophysics – (*Enrollment: 15*)
 Fall 2021 **Geol 109: Climate Change, Science and Rhetoric** – (*Enrollment: 101*)
 Spring 2021 **Geol 112+L: Surficial Earth Dynamics** – (*Enrollment: 11*)
Geol 331+L: Climate Dynamics: Past, Present, and Future – (*Enrollment: 16*)
 Fall 2020 **Geol 109: Climate Change, Science and Rhetoric** – (*Enrollment: 31*)

University of Washington: Courses Taught

- Fall 2017 **University of Washington, ESS 431/505: Principles of Glaciology** – (*Enrollment: 25UG, 3G*)

Field Experience

- 2019-20 **Radar Profiling and Measurements of Englacial Strain, Hercules Dome, East Antarctica**
 (10 weeks) Year 2 of data collection at Hercules Dome (see below).
- 2018-19 **Radar Profiling and Measurements of Englacial Strain, Hercules Dome, East Antarctica**
 (10 weeks) In support of a future ice coring program, a team from the University of Washington worked to characterized the structure and dynamics of Hercules Dome, a local ice divide sitting just east of the Transantarctic mountains. This is an ideal site to identify the behavior of the West Antarctic Ice Sheet (WAIS) during the previous interglacial (the Eemian), a period thought to be 2 degrees warmer than the present. If WAIS were substantially thinner during the Eemian, the difference in local atmospheric circulation that would result will be recorded in ice at Hercules Dome.
- 2017-18 **Terrestrial Radar Interferometry, Coleman and Roosevelt Glaciers, Mt. Baker, WA**
 (2 weeks) Together with 3 graduate and 3 undergraduate students, we conducted a series of repeat GPRi (Gamma Portable Radar interferometer) radar campaigns over the course of summers, 2017-18, in order to measure temporal variations in glacier flow speed. These were calibrated with simultaneous flow-speed measurements taken on glacier, using real-time kinematic GPS.
- 2014 **Surface and Borehole Geophysics, WAIS Divide, West Antarctica**
 (8 weeks) We conducted a seismic AVO survey, using both a surface geophone array and a borehole seismometer stationed in the relict WAIS Divide Ice Core borehole. We also deployed a 3MHz radar system, and performed shallow refraction seismic surveys to compute firn density profiles at several locations along a transect perpendicular to the ice divide.

Funded Proposals

- | | | |
|-----------|---|--|
| 2020-2023 | NASA 80NSSC20K0958
\$110,803.72 | PI – Integrating surface and subsurface observations to understand glacier sliding in West Antarctica |
| 2021-2024 | NASA 80NSSC21K0753
\$486,490.00 | PI – Multipass and tomography enabled data products for subsurface characterization and ice sheet model refinement |
| 2022-2027 | NSF 2019719 \$212,911.41 | Institutional Lead – STC: Center for OLDest Ice EXploration |
| 2022-2027 | NSF 2118285 \$145,890.69 | Institutional Lead – HDR Institute: HARP- Harnessing Data and Model Revolution in the Polar Regions |

Research Advising

I have participated in the advising of the following students:

- | | | |
|-------|-----------------|---|
| 2022 | Ruth Zuraw | (UG - AC) [Project in Development] |
| 2022 | Sophia Price | (UG - AC) [Project in Development] |
| 2021+ | Ellen Mutter | (UG - AC) Geophysical data at ice core sites |
| 2021 | Feli Obasi | (UG - AC) Evaluating Sea Level Rise as Nauru |
| 2021+ | Will Dienstfrey | (UG - AC) Relating postglacial landscapes and subglacial environments |
| 2021 | Charlie Estes | (UG - AC) Glacier cliff height determination |
| 2021 | Trintje Nydam | (UG - AC) Measuring glacier change using ICESat-2 |
| 2020+ | Jon Vale | (UG - AC) Modeling change at Whillans Ice Stream |

2020+	Elizabeth Birmingham	(UG - AC) Surface elevation change, Thwaites Glacier
2020+	Dalya Ackerman	(UG - AC) Surface elevation change, Thwaites Glacier
2017+	Andrew Hoffman	(Grad - UW) Radar Processing and Interpretation, Thwaites Glacier
2017+	Ben Hills	(Grad - UW) Radar reflection power interpretation, NEGIS
2016+	Annika Horlings	(Grad - UW) Surface elevation change over Thwaites Glacier
2017	Adam Stanford-Moore	(UG - Stanford) Radar interferometry on Mt. Baker, WA
2017	Ethan Guzek	(UG - UW) Englacial structures at subglacial lake Whillans
2016	Priyanka Bose	(UG - PSU) Basal crevasse mapping, Kamb Ice Stream
2015	Gina Sarkawi	(UG - PSU) Radar data processing on Kamb Ice Stream

Service

2022-Present	Geology Department "TGIRx" (Thank Goodness It's Rocks) Coordinator - organized our weekly departmental community meetings
2022-Present	Member of the COLDEX and iHARP Education and Outreach Committees - helping to coordinate the education and outreach programs for the NSF STC and HDR institutes.
2021-Present	Member of the Amherst College High Performance Computing Committee - committee who meets monthly to manage the campus hiring and strategy around high performance computing
2021-Present	Member of the Amherst College Faculty Computing Committee - consultative faculty committee, biweekly meetings with the head of IT
2020-Present	Reviewer - IPCC AR6 Working Group 2, Second Order Draft
2013-Present	Referee - Nature, Science, Geology, Communications: Earth and Environment, Journal of Geophysical Research, The Cryosphere, IEEE, Cold Regions Science and Technology, Journal of Glaciology, Annals of Glaciology
2017-Present	Session Convener - AGU Fall Meeting, GSA Annual Meeting
2017-Present	Proposal Review Panelist and External Reviewer - NASA, NSF
2020-Present	ICESat-2 Science Team Member of the scientific advisory board for NASA's ICESat-2 Satellite mission. Members were selected by competitive application.
2012-Present	Member of the Following Departmental Committees: Diversity Committee - University of Washington Earth and Space Sciences (<i>Member, 2017+</i>) Earth and Space Sciences Museum Board - PSU (<i>Student Member, 2015-16</i>) Faculty Committee - PSU Department of Geosciences (<i>Student Representative, 2012-15</i>)
2017-2020	NASA Sea Level Change Team Determined through an open call for proposals, NASA has selected 8 teams to collaborate to identify, quantify, and project decadal sea level change. Together with Dr. Knut Christianson, I am responsible for altimetry integration into predictions of future sea level rise from the ice sheets.
2016-2020	ICESat-2 Science Definition Team Working with Dr. Ben Smith at the University of Washington's Applied Physics lab, I assist with algorithm testing and optimization for the ice sheet surface height determination scheme in development for the upcoming ICESat-II mission.

Outreach

2017-20	Polar Science Weekend Presented ice dynamics and ice-core exhibits at the Pacific Science Center as part of Polar Science Weekend.
2017-19	Middle School Curriculum Development and Science Night Worked with Guy Lawrence (TOPS School, Seattle Public School System) to develop outreach events for his middle school science classroom.
2017/18	UW Earth and Space Sciences Diversity and Inclusion Committee A student, faculty, and postdoc committee dedicated to formulating department priorities for recruiting, admission, and culture to foster departmental diversity.
2016	Chair - Geoscience Graduate Colloquium Committee

Lead the organization of Penn State's annual Geosciences colloquium, a two day conference where geoscience students from Penn State University and Tohoku University presented their research in both oral and poster formats.

2015-16 Chair - Student Museum Committee, Penn State Earth and Mineral Sciences Museum

I organized and lead a student run committee for museum exhibit development and curation. Through this committee, I lead the development of an exhibit on ocean acidification currently on display in Penn State's EMS Museum. This committee been converted into a 1 credit seminar in the PSU department of Geosciences.

2015-16 Museum Board Member - Penn State Earth and Mineral Sciences Museum

Student representative to the campus museum evaluation board.

2012-15 Student Representative to the Faculty - Penn State Department of Geosciences

I acted as an advocate for student interests at Penn State's Geoscience faculty meetings.

2014 Data Sonification Team - Penn State Polar Center

Worked with Dr. Mark Ballora and Dr. David Pollard to convert Ice Sheet time-series data to sound. This was done as a public exhibit on novel ways to communicate climate data.

Conference Proceedings and Invited Talks (Presenting Author)

2021

46. Holschuh, N. (2021a). Site selection and ice-sheet modeling. *Hercules Dome Ice Core Workshop & Open Science Meeting*.
45. Holschuh, N. (2021b). Integrating surface and subsurface observations to understand glacier sliding in West Antarctica. *ICESat-2 Science Team Meeting*.
44. Holschuh, N. (2021c). How can Maxwell help us project future sea level rise? *Reed Physics Seminar*. (Remote from Amherst, MA).

2020

42. Holschuh, N., K. A. Christianson, and J. D. Paden (2020). Evaluating the likelihood of flow reactivation at the sticky-spot of Whillans Ice Stream using ICESat-2 and swath radar topography. *AGU Fall Meeting*. (Remote from Amherst, MA).
41. Holschuh, N. (2020a). Can we decode postglacial landscapes using modern ice-sheet beds? *Geology Colloquium Series - University of Illinois, Urbana-Champaign*. (Remote from Amherst, MA).
40. Holschuh, N. (2020b). Geophysics and Climate. *Carleton Geology Lecture Series*. (Remote from Seattle, WA).

2019

38. Holschuh, N. (2019). Investigating modern and paleo ice sheet dynamics using ice penetrating radar. *Western Washington University Geology Colloquium*. Bellingham, WA.
37. Holschuh, N., K. Christianson, and J. Paden (2019a). Contextualizing the slow-down of Whillans Ice Stream using ICESat-2 and swath radar topography. *WAIS Workshop*. Julian, CA.
36. Holschuh, N., K. Christianson, and J. Paden (2019b). Swath topography, and the future of polar bed mapping. *IGS: Symposium on Five Decades of Radioglaciology*. Palo Alto, CA.
35. Holschuh, N., K. Christianson, J. Pade, R. B. Alley, and S. Anandakrishnan (2019). Linking Postglacial Landscapes and Subglacial Processes through Swath Radar Imaging at Thwaites Glacier, West Antarctica. *IGS: Glacial Erosion and Sedimentation*. Madison, WI.

2018

33. Holschuh, N. (2018a). Beyond Ice Thickness: Inferring the Flow Dynamics and Physical Properties of Ice Sheets Using Radar. *University of Oregon: Geosciences Colloquium Series*. Eugene, OR.
32. Holschuh, N., K. Christianson, J. D. Paden, R. B. Alley, and S. Anandakrishnan (2018). Reinterpreting the Global Paleo-Ice Sheet Record through Observed, In Situ Subglacial Landforms at Thwaites Glacier. *WAIS Workshop*. Stony Point, NY.
31. Holschuh, N., D. Lilien, K. Christianson, and E. Bagshaw (2018). Using radar to evaluate the thermal stabilization of ice stream shear margins. *SCAR Open Science Meeting*. Davos, Switzerland.
30. Holschuh, N. (2018b). Challenges to layer tracing and insights from direction-of-arrival analysis for Antarctic englacial layers. *AntArchitecture Workshop*. Davos, Switzerland.

29. Holschuh, N., D. Lilien, and K. Christianson (2018). Using radar to understand the processes controlling ice flow speed in Greenland. *University of Washington Postdoctoral Research Symposium*. Seattle, WA.

2017

28. Holschuh, N., D. Lilien, and K. Christianson (2017a). Estimating the Heat Production and Distribution across Ice-Stream Shear Margins Using Surface Velocities. *AGU Fall Meeting*. New Orleans, LA.
27. Holschuh, N., D. Lilien, and K. Christianson (2017b). Disentangling the thermal and hydrologic signals expressed in radar data collected near EGRIP. *NEGIS Workshop*. Copenhagen, DK.
26. Christianson, K., N. Holschuh, S. Anandakrishnan, R. Alley, J. Paden, L. Peters, and J. Sprick (2017). A Varied Subglacial Landscape Under Thwaites Glacier, West Antarctica. *Geological Society of America Fall Meeting*. Seattle, WA.
25. Holschuh, N., K. Christianson, H. Conway, and R. Jacobel (2017). Record of the ice sheet interior response to Siple Coast Ice Stream variability from glacial stratigraphy. *WAIS Workshop*. Coupeville, WA.
24. Holschuh, N. (2017a). Ground-based radar stratigraphy across Antarctica. *AntArchitecture Workshop*. Edinburgh, Scotland.
23. Holschuh, N. (2017b). The intersection of electromagnetics and ice physics. *Department of Earth and Space Science Colloquium Series (UW)*. Seattle, WA.
22. Holschuh, N. (2017c). Active Source Imaging of the Cryosphere. *Carleton Geology Lecture Series*. Northfield, MN.
21. Holschuh, N., K. Christianson, H. Conway, and R. W. Jacobel (2017). The effects of subglacial volcanism on ice dynamics near the onset of the Siple Coast Ice Streams. *European Geophysical Union Annual Meeting*. Vienna, Austria.

2016

20. Holschuh, N., K. Christianson, S. Anandakrishnan, R. B. Alley, and R. W. Jacobel (2016a). Common-midpoint radar surveys of ice sheets: a tool for better ice and bed property inversions. *AGU Fall Meeting*. San Francisco, CA.
19. Holschuh, N. (2016). A framework for interpreting internal layer slopes as a record of past and present ice-sheet boundary conditions. *WAIS Workshop*.
18. Holschuh, N., R. Alley, and S. Anandakrishnan (2016). Investigating the Potential for Reconfiguration of the Antarctic and Greenland Ice Sheets. *Penn State Geosciences - Graduate Student Colloquium*. University Park, PA.
17. Holschuh, N., B. R. Parizek, R. B. Alley, and S. Anandakrishnan (2016). Structures, Radars, and Antarctic Adventure. *Seminar Series - Carleton College Department of Geology*. Northfield, MN.

2015

16. Holschuh, N., K. Christianson, S. Anandakrishnan, and R. Alley (2015). What I'm Thankful for this Year: Radar's ability to independently measure the electrical properties of the ice column. *Penn State Geosciences - Geodynamics Colloquium*. University Park, PA.
15. Holschuh, N., B. Parizek, R. Alley, and S. Anandakrishnan (2015a). Internal Reflector Slope Fields as a Proxy for Ice Sheet Velocity Structure. *WAIS Workshop*. Loveland, CO.
14. Holschuh, N., B. Parizek, R. Alley, and S. Anandakrishnan (2015b). Discriminating between Steady-State and Transient Controls on Englacial Structures. *International Symposium on Contemporary Ice-Sheet Dynamics: ocean interaction, meltwater, and non-linear effects*. Cambridge, UK.
13. Holschuh, N., B. R. Parizek, R. B. Alley, S. Anandakrishnan, and R. B. Alley (2015). Using the Englacial Geometry of West Antarctica to Determine its Future Stability. *Advances in Polar Research since the International Polar Year*. University Park, PA.

2014

12. Holschuh, N., K. Christianson, S. Anandakrishnan, and R. Alley (2014). Bistatic Radar case Studies from Antarctica and Greenland. *WAIS Workshop*. Julian, CA.

2013

11. Holschuh, N., D. Pollard, S. Anandakrishnan, and R. Alley (2013a). Consequences of a Deeper Bed for Marie Byrd Land Stability. *WAIS Workshop*. Sterling, VA.
